The Coastal Carolina AAII Group will meet at 7:00 pm on Wed Oct 14, 2015 in the Training Room of the Calabash Fire Dept at 892 Persimmon Road in Calabash NC. Rich Mount will give a short talk on "The Use of the 200 Day Moving Average in Analyzing and Predicting Future Stock Returns"
Bring a question or a topic to discuss.
My topic will be: Many people in the financial services industry are advocating dividend paying stocks for income in lieu of some bonds because we appear to be in a long term low interest rate environment and to go out the risk curve to buy bonds that pay more than good dividend paying stocks is more risky than buying the stocks. What do you think?
