Market Valuation and Concentration

S&P 500 Index and Price-Earnings Ratio

Source: S&P Global. Data as of 3/31/2025 and 4/9/2025.

- The top 10 constituents of the S&P 500 made up 33.6% of the index on March 31, 2025.
- The low volatility factor worked well during March.

WHAT INVESTORS CAN DO NOW

Assessing Your Risk Tolerance

Our Key Goal

- » Primary Priority: Building long-term wealth
- » Other Key Priorities: Ensure living expenses are covered; maintain adequate emergency savings; ensure retirement expenses are met by primary goal
- » When Do We Expect to Reach Our Goal? Continue to build wealth throughout our lifetimes
- » How Many Years Do We Expect to Spend on This Goal? Continuously contribute to savings throughout working years and in retirement as is feasible
- » How Much Do We Expect to Need in Savings? No limit

Our Ability to Tolerate Risk

- » Will downward moves in the market ...
 - ◇ ... hurt our chances of achieving our goal? Should not if we don't panic
 - ◇ ... cause us to pull out of stocks? Should not
 - ◇ ... impact our ability to take withdrawals in the next three to five years? No, we have adequate emergency savings
- » How big of a threat is long-term inflation to achieving our goal? Need positive real returns

Source: "[A One-Page Plan for Maximizing Long-Term Wealth](#)," July 2024 AAI Journal.

Our Emotions and Biases Are Our Portfolio's Biggest Enemy

- Media consumption effect frequently impacts our emotions and actions
- We tend to act quickly instead of slowing down and being thoughtful
- Our desire to avoid short-term losses can lead to bad long-term decisions

Asset Allocation Models

 Aggressive Investor 90% Diversified Stock	 Moderate Investor 60% Diversified Stock	 Conservative Investor 40% Diversified Stock
Time Horizon	Time Horizon	Time Horizon
Long 20+ Years: Investment Horizon <i>For investors who are very risk tolerant</i>	Mid-Term 15+ Years: Investment Horizon <i>For investors who can tolerate some risk</i>	Short-Term 10+ Years: Investment Horizon <i>For investors who are not risk tolerant</i>
Characteristics	Characteristics	Characteristics
Growth: Substantial Income: Very Low Risk: Substantial Year-to-Year Volatility of Portfolio Value 8% Average Annual Growth in Value -37% Bad Year	Growth: Moderate Income: Low Risk: Moderate Year-to-Year Volatility of Portfolio Value 7% Average Annual Growth in Value -21% Bad Year	Growth: Low Income: Moderate Risk: Low Year-to-Year Volatility of Portfolio Value 6% Average Annual Growth in Value -12% Bad Year
Allocations	Allocations	Allocations
10% Fixed Income 90% Diversified Stock Portfolio Return YTD: -0.8% 1 yr: 4.9% 5 yrs: 13.3% 10 yrs: 7.5%	40% Fixed Income 60% Diversified Stock Portfolio Return YTD: 0.3% 1 yr: 5.1% 5 yrs: 9.3% 10 yrs: 5.9%	60% Fixed Income 40% Diversified Stock Portfolio Return YTD: 1.2% 1 yr: 5.8% 5 yrs: 6.4% 10 yrs: 4.7%
Transitions	Transitions	
25% Fixed Income 75% Diversified Stock <i>Investors, as they age, usually transition their portfolios toward less risky and less aggressive asset allocations.</i>	50% Fixed Income 50% Diversified Stock <i>Investors, as they get closer to retirement, usually transition their portfolios toward lower risk and more conservative allocations.</i>	

- Three models that can be personalized to meet your needs.
- Exchange-traded funds (ETFs) and mutual funds can be used in lieu of individual securities.
- Visit <https://www.aaii.com/asset-allocation> for models and resources.

Tax-Loss Harvesting and Wash-Sale Rule

- Sell positions with a paper loss so that the loss can be used to offset taxable gains and up to \$3,000 of other types of income (\$1,500 for married individuals filing separately).
- Capital losses remaining after the deduction are carried over indefinitely into future years.
- Wash-sale rules prevent the loss from being claimed if a similar asset is purchased within 30 days before or after the original sale.
- AAI's 2024 Tax Guide has more information on determining and reporting capital gains.

Retirement Account Tax Opportunities

- Invest recent contributions as opposed to holding cash.
- Avoid taking any loans or distributions from your plans.
- In-kind distributions allow continuous exposure to temporarily depressed investments while also potentially lowering the taxes owed when the asset is eventually sold.
- Roth conversions can create tax-saving opportunity.
 - Lower taxable income from conversion
 - Growth opportunity when markets recover
 - No required minimum distributions (RMDs)

Level3 Cash Allocation Strategy

- Reality-based strategy. Stay invested in assets that offer the greatest potential for long-term wealth growth while satisfying current funding needs and minimizing real risk.
- Covers two to four years of expected expenses.
- Investment allocation should be reviewed and adjusted only once per year, ideally on December 31, to reduce short-term risk and simplify management.
- Defensive Mode triggered if the S&P 500 is more than 5% below its all-time high on decision day; withdrawals shift to the safe (non-equity) portion.
- Withdraw from safe assets until the S&P 500 recovers past the threshold, then resume equity withdrawals and rebuild the safe portion over two years.

Level3 Cash Allocation Strategy

Establishing a Defensive Strategy				
Retirement Date: January 1, 2029				
Date	Market Condition	Transfer Amount	Location of Withdrawal/Transfer	Total Amount in Safe Fund
Pre-Retirement Stage				
1/1/2025	OK	\$50,000	transfer from Equity to Safe	\$50,000
1/1/2026	OK	\$50,000	transfer from Equity to Safe	\$100,000
1/1/2027	OK	\$50,000	transfer from Equity to Safe	\$150,000
1/1/2028	OK	\$50,000	transfer from Equity to Safe	\$200,000
Start of Retirement				
1/1/2029	OK	\$50,000	withdraw from Equity for expenses	\$200,000
1/1/2030	Down	\$50,000	withdraw from Safe for expenses	\$150,000
1/1/2031	Down	\$50,000	withdraw from Safe for expenses	\$100,000
1/1/2032	Down	\$50,000	withdraw from Safe for expenses	\$50,000
1/1/2033	Up	\$50,000	withdraw from Equity for expenses	\$50,000
		\$75,000	transfer from Equity to Safe	\$125,000
1/1/2034	Up	\$50,000	withdraw from Equity for expenses	\$125,000
		\$75,000	transfer from Equity to Safe	\$200,000

Buckets: Allocate by Time

TIME PERIOD:
One to three years
ASSETS:
Cash and cash-equivalents
GOAL:
To fund shorter-term living expenses

TIME PERIOD:
Three to 10 years
ASSETS:
Bonds and balanced funds
GOAL:
Produce a stream of income; provide a combination of stability, inflation protection and modest levels of growth

TIME PERIOD:
11 years and beyond
ASSETS:
Stocks and high-yielding bonds
GOAL:
Long-term portfolio growth

Seeking Opportunity Amid Chaos

- Strong balance sheets with low debt-to-equity ratios
- Supply chain resilience and adaptability
- Consistent free cash flow
- Domestic revenue focus
- Pricing power
- Market leaders with competitive moats
- Essential products and services
- Companies with tariff exemptions or strategic advantages under current trade policies
- Reasonable valuations relative to historical benchmarks

Top Defensive AAI Stock Ideas Screens

 #1

GURU STRATEGY

O'Shaughnessy: Tiny Titans Screen ☆

Bear Market Price Gain: -1.9%
Factors: Value, Size, Momentum

O'Shaughnessy tries to predict the future using historical long-term trends. This screen was developed from the methodology of investment guru Jim O'Shaughnessy.

Top Stocks as of 4/9/2025: [OPFI](#) [FOA](#) [LFVN](#) [RGS](#) [TISI](#) [View All \(25\)](#)

Our formula to the O'Shaughnessy: Tiny Titans Screen.

 #2

GURU STRATEGY

Lynch Screen ☆

Bear Market Price Gain: -2.7%
Factors: Value

A strictly bottom-up approach, focusing on companies familiar to the investor. The stocks in this screen come from a strategy based on the investment guru Peter Lynch.

Top Stocks as of 4/9/2025: [BWLP](#) [ISSC](#) [View All \(2\)](#)

Our formula to the Lynch Screen.

 #3

GURU STRATEGY

Fisher (Philip) Screen ☆

Bear Market Price Gain: -3.4%
Factors: Value, Growth

A perspective on the evolution of the investment philosophy of a successful money manager who learned from his mistakes. A "guru" strategy, the Fisher (Philip) Screen is based on the work of Philip Fisher.

Top Stocks as of 4/9/2025: [GMAB](#) [SRPT](#) [ISSC](#) [View All \(3\)](#)

Our formula to the Fisher (Philip) Screen.

 #4

GURU STRATEGY

O'Shaughnessy: Growth Screen II ☆

Bear Market Price Gain: -3.7%
Factors: Value, Momentum

O'Shaughnessy tries to predict the future using historical long-term trends. The stocks in the O'Shaughnessy: Growth Screen II come from a strategy based on the investment guru Jim O'Shaughnessy.

Strategic Buy Lists: Capitalizing on Market Downturns

“Be fearful when others are greedy and greedy when others are fearful.” —Warren Buffett

Why Buy Lists Are Essential:

- **Combat Emotional Decision-Making** during market panic
- **Enable Swift Action** when quality stocks reach target prices
- **Maintain Focus** on long-term value over short-term volatility

Tip: Develop your buy list during calm market periods based on fundamentals and include specific prices at various discount levels.

Remember: Market corrections, while uncomfortable, often present the best long-term buying opportunities.
