# Identifying Promising Companies With AAll.com’s Stock Screens

2

- Screens can help to identify and analyze stocks in an organized, systematic and disciplined fashion
- Tonight's Discussion
  - Screening benefits and limitations
  - How to select an approach while examining screening resources on AAII.com

## **Benefits of Stock Screening**

- Discover potential investment opportunities you might not have otherwise noticed
- Avoid wasting time on companies that don't meet your basic criteria
- Adds a level of discipline to your investing
  - Forces you to develop and hone investing parameters
  - Helps you to think more clearly about your investing style

## Pitfalls of Stock Screening

- Dependent on the accuracy of the underlying data
- Limited mainly to quantitative factors
  - Factors such as management, brand strength, competitive position, etc. must be evaluated separately
- May still be missing good companies that meet most but not all criteria
- May push your comfort level as unknown companies and industries pass filters

## Stock Screening Process

- Identify stock selection philosophy that fits with time horizon, risk tolerance, analytical skills, and time commitment
- Meaningful Stock Screens
  - Clearly defined objectives with primary criteria that capture the types of stocks you desire
  - Secondary criteria to determine if companies passed the screen for the right reasons
- Even the best screen is only a starting point for further analysis

---

"I believe in the discipline of mastering the best that other people have ever figured out. I don't believe in just sitting down and trying to dream it all up yourself. Nobody's that smart." *Charlie Munger*

- AAIL has examined the characteristics of successful investors and common investment techniques ~ AAIL Stock Screens
- Tracking performance of our interpretation of these approaches on AAIL.com
- Tables of companies passing screens and performance results available on AAIL.com

Factors: Value, Growth, Earnings Estimates

[Strategy Performance](#) [Passing Companies](#) [Learn How To Do It](#)

Every AAIL Stock Screen has a section on performance, list of passing companies and explanation of approach and screen construction

#### Strategy Performance

The chart displays the cumulative performance of three investment strategies from 2000 to 2024. The Dreman With Est Revisions Screen (yellow line) shows a strong upward trend, reaching approximately 3,500% by 2024. The Dreman Screen (blue line) shows a more moderate growth, reaching about 1,000% by 2024. The S&P 500 (green line) shows the lowest performance, reaching about 500% by 2024. The chart includes a legend at the top: Dreman Screen (blue), Dreman With Est Revisions Screen (yellow), and S&P 500 (green). The x-axis represents years from 2000 to 2024, and the y-axis represents percentage return from -500% to 3,500%.

## Stock Screening Process

- Identify stock selection philosophy that fits with time horizon, risk tolerance, analytical skills, and time commitment
- Meaningful Stock Screens
  - Clearly defined objectives with primary criteria that capture the types of stocks you desire
  - Secondary criteria to determine if companies passed the screen for the right reasons
- Even the best screen is only a starting point for further analysis

## Stock Screens

**AAII Members have access to**

- Guru and factor screens with passing company lists
- Historical performance and risk analysis of the strategies
- Ability to save/favorite screens and access My Screens
- Screen Power Rankings
- Ability to track passing companies in the portfolio manager
- Weekly e-newsletter on stock screening and analysis

**A+ Investor/Platinum Subscribers**

All of the above plus

- Custom Stock Screener
- Stock Grades and Stock Grades Screener
